ABOUT ME

As an experienced Software Engineer, I began my career as a freelance Front End Developer, specializing in **HTML**, **CSS**, and **JavaScript**. With over 3 years of experience, I excel in **crafting**, **testing**, **troubleshooting** code to deliver exceptional user experiences. My proficiency extends to **TypeScript**, **React**, and **Next**, enabling me to build dynamic web applications that align with business goals.

EXPERIENCE

Software Engineer (Front End)   📅 Jul 2021 - Nov 2023

Shipper | Jakarta, Indonesia

- Nominated for "**Engineering of the Month for November 2022**" for demonstrating extraordinary contribution and dedication.
- Accumulated savings of approximately **120 million rupiah per month**, achieved by preventing fraud cases and mitigating losses caused by invalid customer data.
- **Collaborated** within a specialized team dedicated to handling the shipping web application, working closely with the UIUX, Product Manager, Backend, and Quality Assurance to ensure the frontend aspect of the company's product aligned seamlessly with company goals.
- Led the implementation of project features, such as Cash on Delivery (COD) functionality, effectively managed order returns, and implemented HubSpot integration into the system.
- **Collaborated** with other teams to develop a significant project and implemented **micro-frontend** architecture for seamless integration.
- Handling debugging and problem-solving in production, swiftly identifying and fixing issues using advanced techniques.

Front End Developer   📅 Agt 2020 - May 2021

CV. Ergossum | Malang, Indonesia

- Executed various projects including UIUX Design, web profiles for companies and web applications.
- Actively participated in client meetings to discuss project requirements and progress.
- **Collaborated** with backend during development processes.
- Conducted comprehensive end-to-end testing prior to project launches.

Front End Developer (Internship)   📅 Feb 2020 - Jul 2020

PT. Sekar Tekno Kreatif | Malang, Indonesia

- Focus on acquiring skills in crafting high-quality code.
- Tasked with refactoring a native **HTML** web application using **React**.
- Engaged in collaborative efforts with Backend and QA teams.
- Actively participated in end-to-end testing processes.
